Pay More For Your Healthcare?
You Already Are!

An examination of WMU's net healthcare costs since 2004-05 reveals some disturbing facts. Over the last few years, the administration's share of the financial burden has increased, but the faculty's share has increased nearly 5 times more!

Administration's cost increase since 2004/5:	6.6%
Faculty's cost increase since 2004/5:	32%

In light of this disparity, it is outrageous that the administration is saying our new contract should shift even *more* costs for healthcare onto faculty's shoulders.

Show them what you think of their "cost shifting" proposals by coming to the WMU-AAUP rally: Monday, August 11, at 11:30am in front of the Administration Building.
